

## Registration now open for the Business to Business event –“Innovations for grazed woodlands”

The [Lebanese Agricultural Research Institute \(LARI\)](#) announced the opening of registrations for the **B2B event “Innovations for grazed woodlands”** which will take place on the 5<sup>th</sup> of October 2022 at the Hotel Le Royal Dbayeh in Beirut, Lebanon, from 9:00 AM to 5:30 PM local time.

The announcement is an open invitation to farmers, entrepreneurs, local administrators, researchers, private companies, policy makers and multiple stakeholders in Lebanon interested in agroforestry issues, especially in the field of grazed woodlands to take part in the series of discussions, round tables and one-on-one meetings which will take place during the initiative.

The program of the day includes onsite and online seminars presented by a professional panel of acclaimed guest speakers including representatives from LARI, LIVINGAGRO consortium and other research institutions revolving around the latest scientific research and implementation of state-of-the-art innovations related to grazed woodlands that contribute to the development of the sector.

Various morning and afternoon sessions will be dedicated to underscore innovative insights and studies, helping stakeholders to deal with the challenges they face. The main topics of the event do include adaptive grazing management, reconciling grazing with trees, mixtures for quality pasture, shade tolerant species, remote sensing techniques to monitor oak forests, thinning and pruning trees in silvopastoral systems, land imprinter for rangelands rehabilitation coupled with rangeland species seeder and hydroponic fodder system.

Interested stakeholders can now check the detailed program leaflet of the event and register for their onsite or online participation via this link:
